

Hugo ARNAL

3rd year student at Epitech

Lyon, France

hugo@hugoarnal.com • <https://hugoarnal.com> • <https://linkedin.com/in/hugo-arnal-0x>

Being passionate about software development for more than 10 years (2016), I'm currently searching for a full-time internship from March 29th 2027 to July 31st 2027. Always willing to learn, I remain open to new opportunities.

Professional experiences

Teaching Assistant - Epitech

February 2026 - March 2027

During my second and third year of studies, I was able to assist students from different programs (Master's degree, Bachelor's degree, Web@cadémie), in different ways:

- Following, evaluation and correction of student projects in different fields (Low level, algorithms, web...)
- Organization and installation of activities for first-year students ("Piscine")
- Workshops and presentations with the aim of deepening or sharing knowledge
- Exam supervision

Backend developer - Onsen SAS

August 2025 - December 2025

Internship done as part of my second year at Epitech. I mainly worked on the Apache Airflow part of the Hippocampe platform.

- Improved information gathering from partner APIs to Hippocampe
- Added monitoring from Apache Airflow to Grafana via Prometheus
- Apache Airflow migration from major version 2 to 3
- Start of the link between the MonSwim platform and Hippocampe

Education

Programme Grande École - Epitech Lyon

2024 - 2029

In order to continue my passion for computers, I joined Epitech, which practices project-based pedagogy. I was able to discover and practice low-level programming (C, Rust, Go), systems (C, Kernel), network programming (socket, HTTP, FTP), DevOps (Kubernetes, CI/CD, Nix).

Projects

Cartridge

Creation of a kernel with drivers (screen, keypad) for the Game Boy Advance. Usage of C, assembly and linker scripts.

Zappy

Creation of an entire game (server, interface and client) where robots battle each other in an automated way. Winner of the Zappy Lyon 2026 tournament.

my_ftp

An implementation of an FTP (File Transfer Protocol) server using a subset of the RFC 959. I have created a tester for it, and hosted it on a cloud provider (VPS).

Additional information

Skills: Versatile, autonomous, management and teamwork, organization

Languages spoken: French (native), English (bilingual)

Passions: Music, swimming, traveling, reading articles
